Hi Brian,

What is the current status of Kinder Morgan's industrial stormwater permit? EPA had issued them an AO in the past for them to comply with the general permit (or successor permit) but it appears they now have some oppositions to their individual permit. Also, I do not have a copy of their individual permit, can you send one along?

Any update would be helpful.

Thanks,

Kim

Subject: Kinder Morgan Port Newark-Salt Storage

Kimberly:

As a followup to our conversation of this date, attached is the Relief Request Letter with attachments submitted to NJDEP. Although we have had several conversations with Brian McLendon regarding action on this request, nothing has happened as yet. We are seeking a meeting with NJDEP to hopefully move this along. As you know, the NJPDES Permit was issued in haste shortly after the USEPA Order was issued. It is understood that USEPA is planning no further actions on the Port Newark salt storage matter and has handed the matter off to NJDEP.

Any assistance you may provide in getting the NJDEP to move forward with Kinder Morgan's pending request would be greatly appreciated.

Please do not hesitate to contact me with any questions.
Thanks again for your assistance.
